& HVAC.*

ESVE Design Solutions Pvt Ltd. is a Bangalore based firm engaged in offering MEP design services to the construction industry. We currently offer a complete one stop MEP design solutions in the streams of Electrical, PHE, Fire & Safety, Security, Automation & HVAC design services.

ESVE has 25 years rich expertise in the field of handling residential apartments (high rise / low rise), gated communities, residential layouts, commercial buildings, malls & multiplexes, educational buildings, hospitals etc.

We have our offices set up in Bangalore & Hyderabad. While Bangalore has 2 office spaces of 3, 400 Sq.ft with 40 + employees, Hyderabad office has a space of 2000 Sq.ft with 18 + employees. The offices are well furnished with state of the art central server, desktops, laptops, plotters, printers.

We also have a well - stocked digital & physical library of technical literature, journals, books etc.

## OUR VISION & MOTIVE.

The vision & Motive of ESVE is to provide futuristic solutions as the building should live not just today but for the years to come, by making design provisions which shall be easy to adopt to emerging technologies and to provide better solutions for energy and resource management and a safe place for the people to live in.

We have tackled challenging site situation like sub soil drainage, Low reliability on water sources successfully by adopting innovative engineering practices to keep the building functioning well.

We have always been the front runners in evaluating and adopting the new trends of plumbing and electrical systems like syphonic rain water systems, HT schemes and other if proved to be effective and economical than conventional system.

## Our Innovative Project Solutions :

The organisation believes in offering design solution to the problems specific to the project & the region, some of the innovative solutions have been:

1. Use of symohonic drainage system for rain water system.
2. Use of local materials & solutions for waste wate treatment & rain water management.

## WHY US?

*Systematic approach to projects in terms of meticulous documentation.*

**TEAM WORK:** The team and its composition is a good blend of experience and expertise across Bangalore and Hyderabad offices. The structure within the team is built to ensure there is effective communication between the members. The same gets reflected back in the project.

1. ESVE uses document management software which ensures effective coordination between the various teams & disciplines, working in Bangalore & Hyderabad.
2. In-house standards formats such as quantity take off sheets, rate analysis thereby increasing the accuracy of the quantities & the cost indicated.
3. Implementation of innovative materials in the project where better design can be ensured & also be cost effective.

# OUR EXTENDED EXPERTISE.

## *Water & Waste Water Management 01.*

Water management system for the buildings, this involves Implementation of innovative & sustainable design solutions to projects which stand completed or in the design stage. The objective is to manage the water in the buildings in a responsible manner by using effective techniques ensuring minimal wastages & emphasising on adopting **Reduce, Reuse & Recycle**.

## *Sewage Treatment Plant 02.*

Innovative design & build solutions for waste water treatment.

## *Value Engineering 03.*

An add on service to the general design for any project which stands completed or in the design stage. This involves a thorough review of the project design, specifications etc. & suggest value engineering involving design optimisation for the project. This helps the client to look at efficient design, material and costing for the project.

## *Design Build 04.*

Turnkey designs build solutions for the project. This gives the client a one stop solution for design as well as execution & will have better management with timely completion and quality of work.

Since time is an essential part of every project, design & build projects can utilize the design & construction time more effectively since the time required for tender bidding, evaluation, coordination between the services can be minimized. This ensures better quality and timely delivery of the project.

## *Peer Review 05.*

Third party review for the project, this facilitates the client to get a review of the design & specifications arrived for the project.

Review shall include detailed study on consultant's design & drawings, bill of quantities & schedule of items based on the design shall be made.

### *QS Engineering 06.*

Review of consultant's design & drawings based on which the detailed bill of quantities, schedule of items & Quantities will be arrived. Preparation of tender documents will be done. The client will be assisted in tender evaluation & appointing vendors on board.

### *Testing & Commissioning 07.*

Expertise in providing testing & commissioning works based on the design of the services. This specialises in conducting testing operations based on standard procedure of operations, further to which the system is commissioned. This facilitates the client to loop the operations between the contractors or the execution agency to the design intended for the project.

The client will have a complete data on hand regarding the system tests & commissioning.

### *Due Diligence 08.*

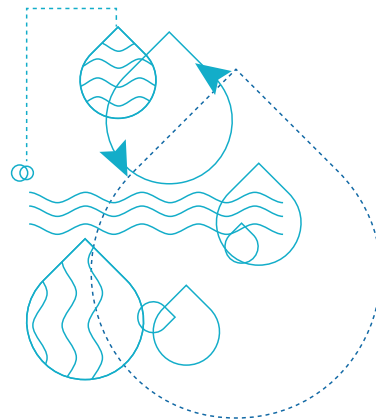

Conducting feasibility studies for prospective projects. This will facilitate the client to understand the services for the building & the feasibility of the same for their requirements.

### *Execution Management 09.*

Project Management for all services in the project. Assisting the client in having vendors on board, quality control of the works happening and timely execution. The material sourced will be in line with the specifications in the BOQ, the material sourced will be reviewed as per the construction progress at site, ensuring no delay in the material arrival at site. With which the client benefits with good rates, good quality of material & no compromise due to lack of vendor/ material awareness.

### *Fire Sanction & Liaison 10.*

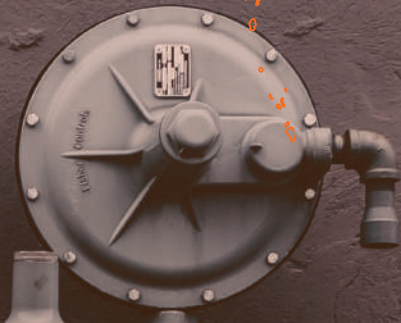

Preparing fire sanction drawings and obtaining fire sanctions from the fire department. Carrying out fire audit for the buildings and obtaining OC for the project.
